ABOUT:

During my nearly 20 years in the retail industry, I had the opportunity to work in every role from associate to upper level management. While I love leading teams and developing talent, my true passion was always the problem solving aspects of my role. After supporting the corporate office with numerous tech projects and watching changing dynamics in the retail sector, I knew it was time to follow my heart and learn development so I could do what I love full-time.

PROJECTS:

VauLT | Front End Capstone
Single page web app built using React.
VauLT allows numismatists to catalog and organizing their ever growing collection of coins and precious metals. This allows them to not only visualize their collection but to additionally render collection value along with profit by coin and collection.

- Allows individual management on a per user basis.
- Full CRUD functionality allowing the addition of users, collections and individual metal storage.
- Collection value and profit derived from API calls to the Metals-API.
- implemented the use of Cloudinary to handle image upload and storage.

TECHNICAL EXPERIENCE:

Software Developer

Nashville Software School | 2020 - Current
    Intensive six-month, full-time remote software development program. The curriculum teaches the skills and technologies required to become a full-stack software developer.

Course inclusive of the following:
- HTML, CSS and JavaScript for the front end along with Python and Django for the server side.
- Created full CRUD single page applications utilizing both Javascript(ES6) and React.
- Projects completed in both individual and group settings using Zoom as a communications platform.
- Source code version control via GitHub including utilization of GitHub projects in addition to issue tracking.

WORK EXPERIENCE:

RETAIL OPERATIONS GENERAL MANAGER

Finnleys| Oct 2019 - Mar 2020

Responsible for providing direction and management for the profitable and efficient day-to-day operations of the company.

- Managed Operations for the organization on both the storeline and corporate side of the business
- Led all aspects of storeline performance to include: Hiring, Talent development, Merchandising, Loss Prevention, Payroll and Human Resources.
- Led the IT initiative for all stores and the corporate office.
- Reported to and worked directly with the owner of the company on all current and future strategic initiatives.
- implemented online review cycle for 2020
- implemented storeline/corporate budget tracking for all store and corporate expenses.

PROJECTS (CONT.)

Nutshell | Group Project

Single page application encompassing all aspects learned during the front end portion of the course. I was tasked with building out the "friends" and "messages" portion of the site.

- Full CRUD application.
- Implemented openweather api to pull in local forecasts.
- Implemented conditional rendering in dropdowns to minimize redundancy in JSON database.

⭕ github.com/NSS-Day-Cohort-42/nutshell-lizard-collectors

Holiday Road | Group Project

Single page application designed to allow the end user to build a National Park travel itinerary.

- Full CRUD application.
- Implemented weather forecasts to match the selected park
- Made API calls to the National Park Services API.
- Allowed users to name and save itineraries .
